EDUCATION

University of California San Diego

Bachelor of Science in Computer Science, Minor in Economics

La Jolla, CA

Sept. 2021 – June 2026

CERTIFICATE

AWS Certified Cloud Practitioner

Issued by AWS — Validates cloud fluency and foundational AWS knowledge

CLF-02

June 2025–June 2028

EXPERIENCE

Software Engineer Intern

June 2025 – August 2025

Transact Campus + CBORD

San Diego, CA

- Developed a chatbot integrated with AWS Bedrock, utilizing agent-based MCPs architecture for modular and intelligent response generation
- Designed and implemented a scalable multi-agent workflow, enabling coordination across specialized agents to handle complex user queries

Web Designer

March 2025 – Present

UCSD Health – Explore Career Path Program

San Diego, CA

- Redesigning internal-facing webpage to improve user experience and navigation for students exploring healthcare careers.
- Developing an admin dashboard for managers and recruiters to efficiently view applications and automate key review workflows.
- Working cross-functionally with program coordinators to align design goals with student and recruiter needs.

Freelance Software Developer

September 2024 – Present

Valhalla FC

Remote

- Developed and maintained software applications to support an online EA Sports FC mobile community with over 850 members.
- Designed and developed multiple bots integrating with the Discord API to enhance community engagement and streamline moderation.

PROJECTS

FÚTBOL DEX | *Google Cloud, Discord API, Django, PostgreSQL*

July 2025 – Present

- Currently in beta testing with **10 active users**, scheduled for public release in **September 2025**.
- Developed and deployed a RESTful API using **Django** on **Google Cloud App Engine**, implementing **JWT-based authentication** for secure and scalable access control.
- Built and integrated backend data storage using **PostgreSQL** for structured and persistent data management.
- Integrated the **Discord API** to enable seamless communication and community interaction.

StudyGenius | *React, Firebase, Firestore, JavaScript*

April 2025 – Present

- Designed and developed a full-stack flashcard web app enabling users to create, edit, and study personalized flashcards with real-time updates.
- Implemented Firebase Authentication and Firestore to securely manage user sessions and store flashcard sets in user-specific collections.

Valhalla Tools (Bot & Spinner) | *Python, React.js, JavaScript, Discord API*

December 2024 – Present

- Built a suite of tools for the Valhalla FC community to support over 850 users, including a moderation bot and a World Cup spinner event platform.
- Implemented features like invite tracking, raid alert detection, leaderboards, and ranked matches to improve server engagement and security.

TECHNICAL SKILLS

Coding Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, x86

Frameworks: React, JUnit, Pandas

Developer Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Android Studio, GDB
