EDUCATION

University of California San Diego

Bachelor of Science in Computer Science, Minor in Economics

La Jolla, CA

Sept. 2021 – June 2026

CERTIFICATIONS

AWS Certified Cloud Practitioner

May 2024

Udemy

- AWS services, cloud architecture, and security best practices. Gaining hands-on experience with EC2, S3, and IAM.

EXPERIENCE

Web Design

March 2025 – Present

UCSD Health – Explore Career Path Program

San Diego, CA

- Redesigning internal-facing webpage to improve user experience and navigation for students exploring healthcare careers.
- Developing an admin dashboard for managers and recruiters to efficiently view applications and automate key review workflows.
- Working cross-functionally with program coordinators to align design goals with student and recruiters needs.

Freelance Software Developer

September 2024 – Present

Valhalla FC

Remote

- Developed and maintained software applications to support an online EA Sports FC mobile community with over 650 members.
- Designed and developed multiple bots integrating with the Discord API to enhance community engagement and streamline moderation.
- Enhanced user engagement through innovative features and efficient system designs.

Computer Science & Math Instructor

October 2022 – Present

Juni Learning

Remote

- Guided students from diverse backgrounds, fostering their understanding and enthusiasm for computer science.
- Selected for advanced courses, including USACO, due to consistent teaching excellence and a proven ability to deliver high-quality educational content.
- Taught a variety of subjects, including AP Computer Science, Java, Python, JavaScript, Data Science, and C.

PROJECTS

StudyGenius | *React, Firebase, Firestore, JavaScript*

April 2025 – Present

- Designed and developed a full-stack flashcard web app enabling users to create, edit, and study personalized flashcards with real-time updates.
- Implemented Firebase Authentication and Firestore to securely manage user sessions and store flashcard sets in user-specific collections.
- Collaborated in a team during our first hackathon, overcoming steep learning curves in component state management and async data syncing.

Valhalla Tools (Bot & Spinner) | *Python, React.js, JavaScript, Discord API*

December 2024 – Present

- Built a suite of tools for the Valhalla FC community to support over 650 users, including a moderation bot and a World Cup spinner event platform.
- Implemented features like invite tracking, raid alert detection, leaderboards, and ranked matches to improve server engagement and security.
- Built a spin-the-wheel style team assignment tool for tournaments, enhancing participation through seamless Discord integration and a dynamic, React-powered interface.
